MEMORANDUM FOR THE RECORD

FROM : Information Processing Officer, OBGI

SUBJECT: Automatic Plotters

25X1A9a At the request of the DD/BGI, a meeting with the DDI Planning
25X1A9a Officer was held on this date for the purpose of discussing the sta-
25X1A9a tus of the automatic plotter. Attending in addition to [REDACTED]
25X1A9a [REDACTED] were [REDACTED] of the Planning Staff and [REDACTED]
25X1A9a [REDACTED] of CD/BGI. [REDACTED] began by reviewing the history
25X1A9a of OBGI-OCS plotter involvement including equipment, funding, oper-
25X1A9a ation, and workload. The possibility of a contract default by the
25X1A9a supplier of the new plotter was cited. Because of this, considera-
25X1A9a tion must be given to the consequences. It was suggested by [REDACTED]
25X1A9a [REDACTED] that because of experience, proportion of production (75%), and
25X1A9a space available, OBGI rather than OCS could better operate the plot-
25X1A9a ter. [REDACTED] concurred and suggested also that OBGI assume the
25X1A9a [REDACTED] per month rental if default does occur. Recovery of the [REDACTED]
25X1A9a committed 2 years ago will be a factor in funding about [REDACTED] for
25X1A9a another machine. The additional funds required in the event of a
25X1A9a reorder have not been budgeted in OBGI or OCS. At the end of the
25X1A9a meeting, [REDACTED] said that he would check on recovering the funds
25X1A9a already budgeted and also speak informally to the Director of OCS
25X1A9a after the results of the plotter acceptance tests are known.

25X1A9a [REDACTED]
